Vision

Our vision is to make wood-heated bathing and showering under the open sky the standard.

Mission

To achieve this, we build massive stainless steel products heated by wood, designed for year-round outdoor use.

About Us

Genuine & Handmade

In an era of mass production, we rely on human precision. Every piece leaving our manufactory is a tested unique item.

100% Made in Austria

For us, quality means short paths. We manufacture in Austria, securing local skilled labor. This guarantees a high standard while preserving resources through regional value creation.

Independent & Enduring

By utilizing local raw materials, we remain independent. We rely uncompromisingly on solid stainless steel and real solid wood — materials that gain character over time.

Built to Last

Our designs follow the principle of lasting value. Whether it is the stove or the seal: every component can be individually replaced if needed. This is our understanding of true responsibility and modular durability.

Crafted for the Elements

Our outdoor-bathtub models, hot tubs, and outdoor-shower installations are personal sanctuaries created for moments of quiet and true outdoor regeneration.

Outdoor-Shower

The outdoor-shower from Feuerwasser provides warm water via an integrated wood-fired continuous flow heater. The patented system operates completely without electricity or gas, wherever a water connection is available.

Dimensions (H/W/D)	255 x 30 x 55 cm
Weight	unpacked: 30 kg packed: 50 kg
Combustion Chamber	Ø 28 cm, 40 cm deep
Heating Time	Within 5 minutes
Material	Stainless steel

Outdoor-Shower Equipment

SHOWER STAND

Stainless steel construction weighted with standard stone slabs (40 × 40 × 4 cm) for stable, location-independent setup.

Material: Stainless steel
Dimensions: 86 x 83 x 10 cm

RAIN CAP

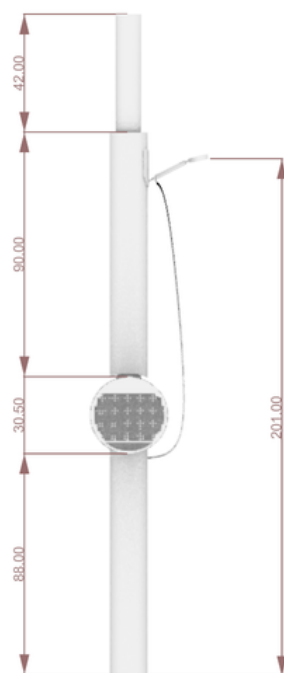

The 1 mm thick stainless steel attachment prevents precipitation from entering directly into the flue pipe.

Material: Stainless steel
Dimensions: 25 x 15 x 25 cm

Outdoor-Bathtub

An outdoor-bathtub with two possibilities: The compact construction enables a swift transition between regenerative cold and soothing warmth. This model serves as an efficient ice bath for daily routines or can be heated up in a very short time for a relaxing bath under the open sky.

Dimensions (L/W/H)	215 x 85 x 63 cm
Weight	unpacked: 130 kg packed: 160 kg
Volume	550 liters
Fill Capacity	300 liters
Heating Duration	From 10°C to 38°C in 45–90 minutes
Temperature	Flexible (warm or cold water)
Number of people	1–2 people
Materials	Inner tub: V4A stainless steel Cladding: Pine Substructure: Stainless steel

Outdoor-Bathtub Equipment

COVER

Multi-layer composite material with locking elastic band protects the basin and wooden frame from dirt and premature weathering.

Material: PVC

Dimensions: 215 x 85 x 10 cm

PADDLE WITH THERMOMETER

The paddle from Feuerwasser allows for the simultaneous stirring of the water and precise temperature control.

Material: Solid pine

Dimensions: 90 x 16 x 3 cm

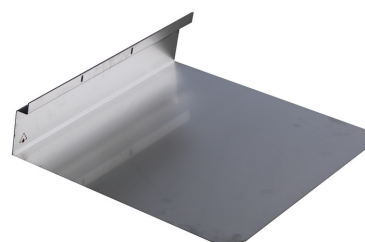

FLOOR PROTECTION PLATE

The 3 mm thick stainless steel plate protects the surface beneath the firebox from falling ash and heat exposure.

Material: Stainless steel

Dimensions: 50 x 50 cm

Outdoor-Bathtub Equipment

DRAIN ELBOW

Allows you to connect a garden hose to the drain and direct the wastewater precisely to a desired location.

Materials: Stainless steel & brass

Dimensions: 15 x 5 x 7 cm

RAIN CAP

The 1 mm thick stainless steel attachment prevents precipitation from entering directly into the flue pipe.

Material: Stainless steel

Dimensions: 25 x 15 x 25 cm

SET OF 2 CUP HOLDERS

The holders, which can be fixed to the edge of the tub, ensure the stable positioning of the included glasses within arm's reach.

Material: Stainless steel & glass

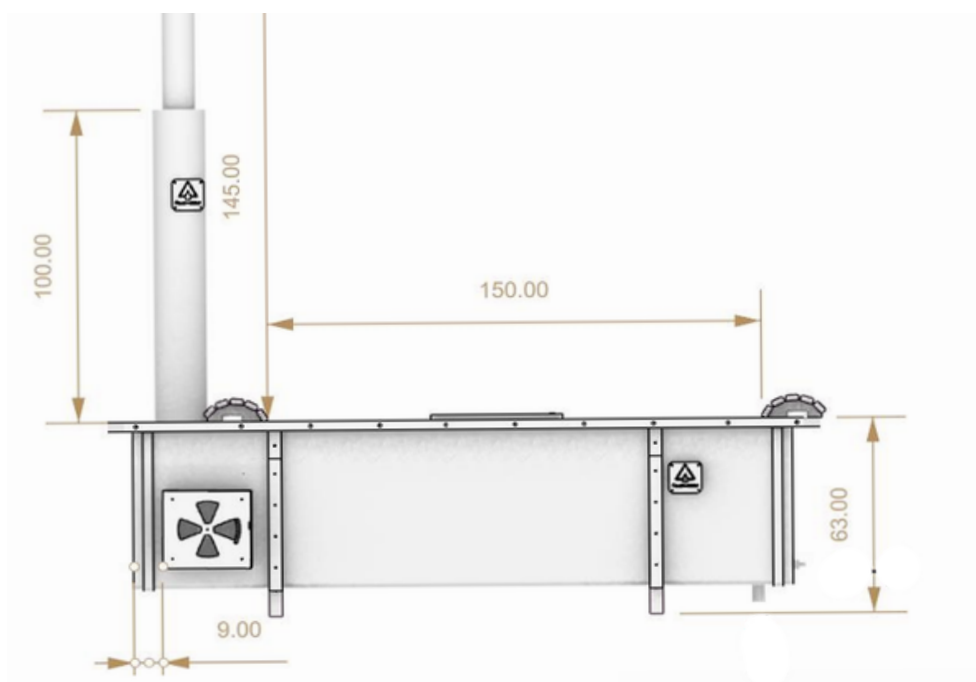

Dimensions: Ø 6.4; 8.5 x 12 x 4 cm

Scope of delivery: 2 x Holders, 2 x Glasses, 2 x Twist locks

Stainless Steel Hot Tub

A stainless steel hot tub with two possibilities: The solid construction offers the choice between regenerative cold and soothing warmth. This model serves as a classic plunge pool after the sauna or can be heated for a relaxing bath.

Dimensions	Outer-Ø 180 cm, 90 cm high
Weight	Hot tub unpacked: 120 kg Hot tub with external stove packed: 200 kg
External Stove	V4A (H/W/D): 64 cm / 40 cm / 70 cm (weight: 50 kg)
Volume	1225 liters
Fill Capacity	850 liters
Heating Duration	From 10°C to 38°C in 90 – 120 minutes
Number of people	2 people
Materials	Basin: 4 mm V4A stainless steel (seamless) Frame: Solid pine Substructure: Stainless steel

Stainless Steel Hot Tub Equipment

COVER

The multi-layer composite material, including an elastic fastening strap and support cross-brace, protects both the tub and the wooden frame of the stainless steel hot tub from dirt and premature weathering.

Material: PVC

Dimensions: Ø 180 x 5 cm

SET OF 2 NECKRESTS

The ergonomically shaped neckrest provides a comfortable reclining and sitting position and is especially recommended for individuals 1.85 m and taller.

Material: Solid pine

Dimensions: 20 x 15 x 10 cm

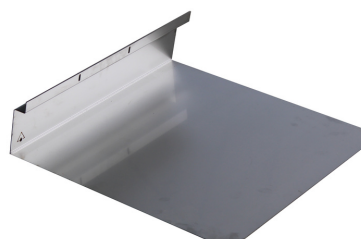

FLOOR PROTECTION PLATE

The 3 mm thick stainless steel plate protects the surface beneath the firebox from falling ash and heat exposure.

Material: Stainless steel

Dimensions: 40 x 50 cm

Stainless Steel Hot Tub Equipment

SET OF 2 CUP HOLDERS

The holders, which can be fixed to the edge of the tub, ensure the stable positioning of the included glasses within arm's reach.
