

SPECIFICATION & INFORMATION

THE TABLE (S/M/L)

GENERAL DISCRIPTION

The picnic table consists of a folded tubular steel construction on which wooden boards are mounted.

The tubes have a diameter of 50 mm and are made of metallised and then powder-coated steel.

The lower structure consists of 5 parts that are connected to each other by means of stainless steel connecting tubes and stainless steel bolts. The top and the seats consist of wooden planks with a thickness of 30 mm and a width of 165 mm.

These planks are screwed to the underside using stainless steel screws.

There are 8 adjustable feet at the bottom of the table to stabilise it.

The shape of the table allows you to slide in from the side without hindrance.

FEATURES

The standard colours for the base are light grey, yellow-grey and black. Any RAL colour can be chosen on special request. The wood is Afzelia Doussié and has durability class 1.

The wood is standard untreated but can be delivered treated.

All parts of the picnic table are weatherproof.

The table can be anchored to the ground using a separately available floor bracket.

MAINTENANCE

In case the wood is not treated, annual maintenance is recommended.

DIMENSIONS

Table Small

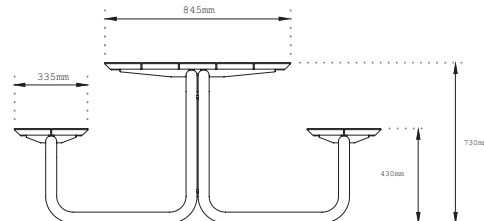

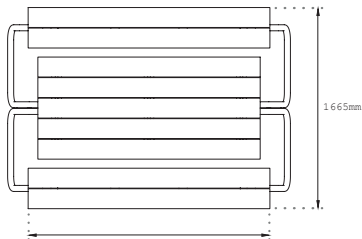

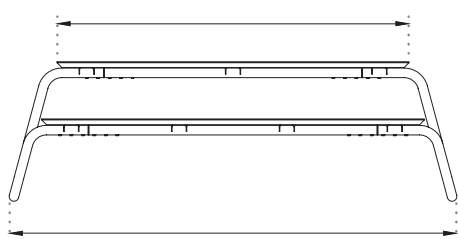

Total Length: ± 234 CM
 Total Width: ± 167 CM
 Blade Height: ± 73 CM
 Seat Height: ± 43 CM
 Weight: ± 120 KG
 up to 8 persons

Table Medium

Total Length: ± 284 CM
 Total Width: ± 167 CM
 Blade Height: ± 73 CM
 Seat Height: ± 43 CM
 Weight: ± 150 KG
 Up to 10 persons

Table Large

Total Length: ± 334 CM
 Total Width: ± 167 CM
 Blade Height: ± 73 CM
 Seat Height: ± 43 CM
 Weight: ± 190 KG
 Up to 12 persons

TRANSPORT

The table is transported in 5 pieces divided into two boxes and assembled on site using a reusable assembly kit.

The size of the package is 240x100x80cm (Small), 290x100x80cm (Medium) or 340x100x80cm (Large).
