Crea7ion By GlammFire—The line of perfection

It is designed to emphasize the unique and continuous expressions of the flame.

Crea7ion is an electronic system with an innovative technology, which stand out its simple design, practical functionality and low consumption. Its structure and solidity ensure a perfectly safe and linear flame, while its ecological character keeps a respecting commitment to the environment, contributing to a pleasant comfort and well-being.

Crea7ion can be integrated into virtually any environment or directly in different types of structures (eg.: furniture or masonry). A system totally safe for projects led by architects, decorators and interior designers.

Installation

In order to ensure a safety margin respect to the ground it is recommended to keep a minimum distance of 400 mm between the floor and the top of the combustion fire ;

The surface which you want to install the combustion fire must be as level as possible;

Dimensions:

To access to the control valve and tank will be necessary to ensure a distance between the fireplace and potential obstacles on lateral sides superior to 300 mm.

Flammable materials

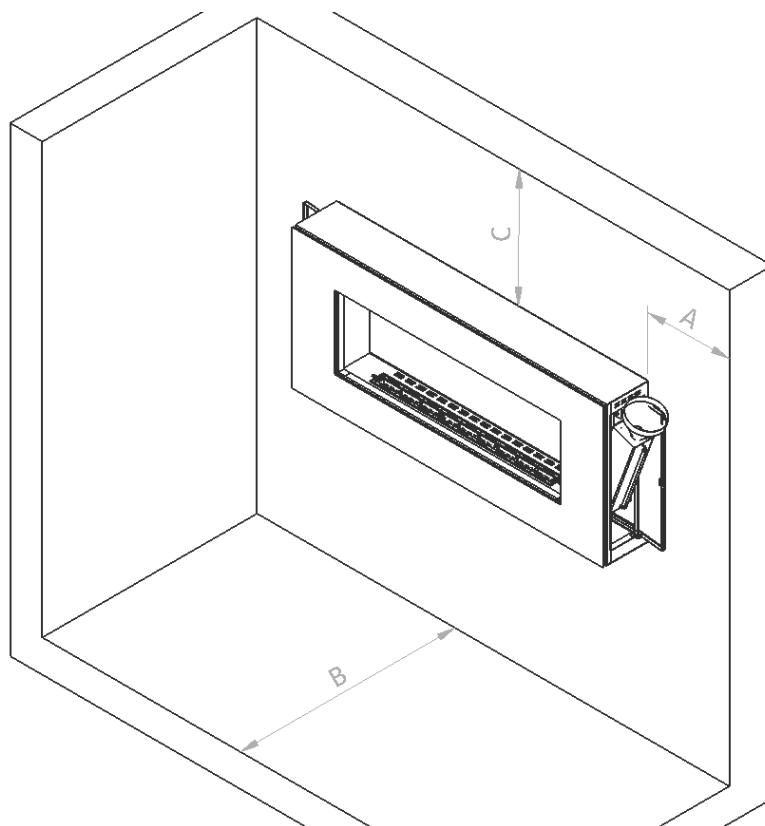

- Do not place flammable materials near the fireplace, within 1m;
- Racks or shelves should be distant:
 - From fireplaces: 500 mm;
 - From combustion fire lines: 1000 mm;

Materials: stone/metal/ceramics

- A - 150 mm;
- B - 100 mm;
- C - 500 mm;

Other non-flammable materials

- A - 200 mm;
- B - 250 mm;
- C - 600 mm;

Installation Procedures

Very Important:

We recommend extreme caution when unpacking your fireplace. The decorative cover is on top of the fireplace body, but it is loose.

Separate the decorative cover to start the installation (unscrew the nuts—no. 2 of image B).

- 1 — Fireplace body
- 2 — Decorative rim

glamm
fire

GlammFire

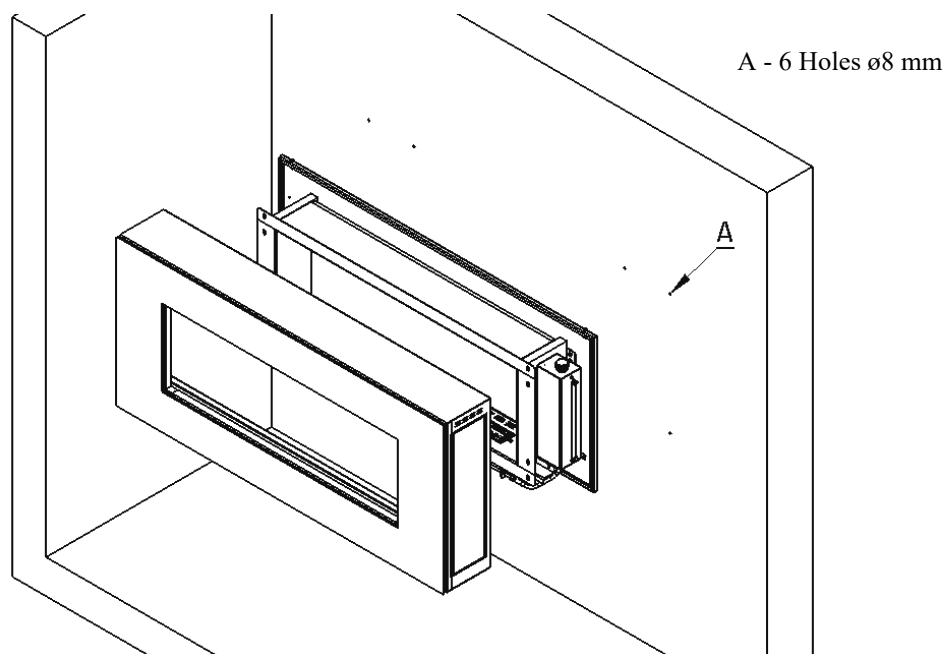

Crea7ion.M

Place the fireplace in the desired location and mark the six holes required on the wall to install it, using the supplied template.

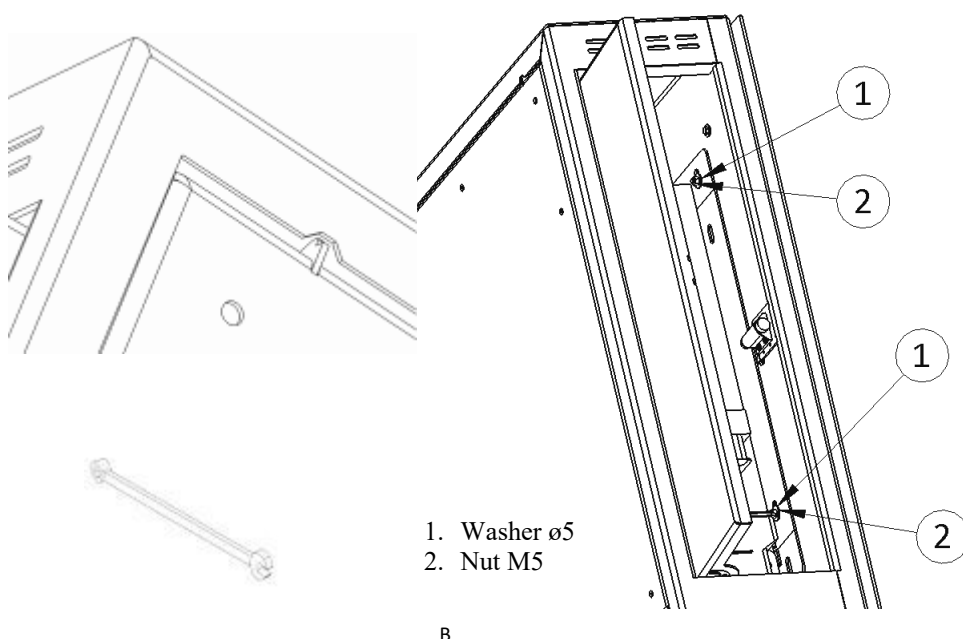

Make sure your fireplace is level.

Choose the type of fastener suitable for the wall material and proceed to the drilling.

Tighten the fireplace to the wall properly. Check the stability and levelling. Make adjustments if necessary.

To complete the installation of your fireplace fit the decorative rim and tighten the nuts provided.

Crea7ion.M

Operation Instructions

- Access the tank through the access door on the right side of the fireplace;
- With the help of the funnel and mug fill the desired amount of fuel (maximum: 3 litres). Check the level through the fuel tube indicator;
- **Ignite the fire:** Rotate knob A counter clockwise (+), after a few seconds ignite with the lighter supplied, once you verify that there is bio-ethanol in the combustion fire line.

- **Flame regulation:** (-) to decrease, (+) to increase

- **Switch off:** Rotate knob clockwise.

Once switched off residual flame near the fuel inlets may remain for approximately 2 to 10 minutes. Afterwards the flame becomes completely extinct .

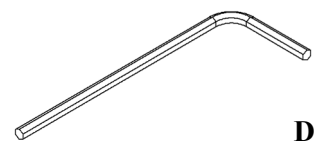

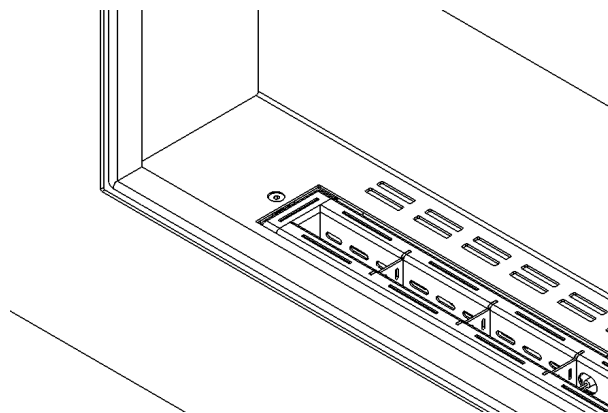

- **Levelling of combustion fire line**

If the flame does not occupy the entire line it will be necessary to level the combustion fire line.

Lack of flame on the left: Turn the left screw counter clockwise, and turn the right screw clockwise, if necessary.

Lack of flame on the right side: Turn the right screw counter clockwise, and turn the left screw clockwise, if necessary.

Repeat the described procedure till you get a uniform flame.
