Please read this Instruction Manual carefully before using your decorative fireplace. It contains important operating and maintenance instructions, that should be followed correctly, in order to ensure a durable use of your decorative fireplace.

All presented cautions and warnings must be respected.  
Keep this manual for future reference.

This Instruction Manual is subject to change without notice.

## 3—Safety Instructions

### 3.1—Ventilation

It is recommended that you keep a good ventilation of the area, in order to ensure a healthy level of oxygen.

Bioethanol combustion releases carbon dioxide (CO<sub>2</sub>) and water (H<sub>2</sub>O). The combustion requires oxygen, therefore the area where the fireplace is should have adequate ventilation with ventilation grids or other means, to allow air quality and circulation.

### 3.2—Cautions:

Glammfire is concerned about your safety, therefore we have taken all necessary consideration for conception, fabrication, assembly and transport, to ensure perfect functioning.

We therefore ask you to thoroughly follow our instructions for assembly, use and maintenance.

- Do not cover your decorative fireplace;
- Keep it away from flames, ignition sources, and flammable materials;
- Do not place the fireplace near windows or doors that can create drafts. These drafts may cause irregular functioning;
- Do not blow to the combustion fire line when igniting or during normal functioning of the fireplace;
- Keep a regular watch, during use of the fireplace;
- Keep children and animals away from the fireplace. Children do not recognize danger. Therefore make sure children are kept at a safe distance;
- Keep children watched when fireplace is working;
- The fireplace should not be exposed to direct sunlight or any heat source, as it may damage its materials;
- If you spill bioethanol onto the floor absorb it with a cloth, and then clean with a wet cloth, to avoid ignition outside the combustion fire line and stains on the floor;
- In case you spill bioethanol in the fireplace clean it immediately with a wet cloth, to avoid ignition outside the combustion fire line and damages to the finishing of the fireplace (paint, lacquers, leathers, amongst others);
- **Attention:** While working the fireplace may achieve very high temperatures. Therefore avoid touching it. Areas of potential contact with skin may cause burns;
- Do not fill the combustion fire line while hot, wait for it to cool down;
- Never pour bioethanol over the flame;
- After extinction of the flame wait approximately 15 minutes before handling the fireplace;
- In case of fire use a fire blanket or a fire extinguisher;

- Do not use water to extinguish the fire;
- Do not use chemical products to clean the fireplace, as they may damage the materials. When in doubt contact an authorized dealer;
- 
- After flame cutting may remain small residual flames at the point of fuel inlet for approximately 2 to 10 minutes. At the end of this time the flame will extinguish naturally;
- If bioethanol pours out during the process of filling up the tank, clean the tank and surrounding area;
- Decorative stones, wood or other accessories should not be placed directly on top of the burning area. Should you use decorative accessories make sure:
  - The accessories do not interfere with the flame;
  - Are only for decorating the fireplaces and combustion fires;
  - There is no risk of falling inside the combustion fire.

## 4—Fuel

### 4.1—Bioethanol – The adequate fuel

- Glammfire fireplaces are designed to work with quality bioethanol, fully tested. Only this fuel ensures clean and efficient combustion. Fuel with less or inappropriate quality may lead to:
  - Higher probability of malfunction;
  - Reduction in durability of the system;
  - Incomplete and inefficient combustion;
  - Smoke and odours;
  - Residues inside the combustion fire line.
- Bioethanol is internationally recognized as being the major source of renewable energy, 100% ecological and environmentally friendly. It is made from fermentation and distillation of sugars from plants, such as sugar cane, potato, beetroot and cereals;
- The use of bioethanol guarantees a reduction of 85% in CO<sub>2</sub> emissions, therefore contributing for the reduction of global warming;
- Use only bioethanol as fuel. Only bioethanol will make a clean and perfect combustion;
- Keep bioethanol away from children and animals, as well as from a working fireplace;
- Avoid contact with eyes and skin;
- Do not drink bioethanol. In case you do go to the nearest hospital;
- Bioethanol should be kept at a minimum distance of 1 m from the fireplace;
- Do not place bioethanol in front of the fireplace;
- For security reasons bioethanol should be stored at a room temperature of approximately 20 °C.
- Use only liquid bioethanol, recommended by GlammFire.

## 5—Installation

In order to ensure a safety margin respect to the ground it is recommended to keep a minimum distance of 400 mm between the floor and the top of the combustion fire ;

The surface which you want to install the combustion fire must be as level as possible;

### 5.1—Flammable materials

- Do not place flammable materials near the fireplace, within 1m;
- Racks or shelves should be distant:
  - From fireplaces: 500 mm;
  - From combustion fire lines: 1000 mm;

### 5.2—Materials: stone/metal/ceramics

- A - 100 mm;
- B - 100 mm;
- C - 500 mm;

### 5.3—Other non-flammable materials

- A - 200 mm;
- B - 250 mm;
- C - 600 mm;

## 5.4—Installation Procedures

### Very Important:

We recommend extreme caution when unpacking your fireplace.  
Place the fireplace in the desired location and check the stability and levelling.  
Make sure your fireplace is level.

Using the metallic handles that are supplied with Crea7ionEVO, please introduce it into the LoftEVO Plus.

## 6—Maintenance

- The combustion fire line should be cleaned regularly using a damp cloth;
- The more persistent marks can be removed using a soft cloth and a mixture of lukewarm water or with a suitable product for cleaning stainless steel;
- Never use chemicals not suitable for cleaning stainless steel;
- Do not use steel-wool or abrasive sponges. The surface can be scratched by them;
- The manufacturer is not liable for any damage arising from misuse and/ or fraudulent of the product. The manufacturer also can not be blamed for the failure to observe the cleaning or application instructions and/ or use of any other cleaning techniques;
- **Note:** Failure to follow the above rules eliminates any factory warranty on all models or fireplaces, losing the customer the right to require repair under warranty.

7—Overall Dimensions

8—Specifications

| MODEL         | Weight<br>(kg) | Capacity (litres) | Power<br>(kW) | Combustion fire line<br>(mm) | Autonomy<br>(hours) |
|---------------|----------------|-------------------|---------------|------------------------------|---------------------|
| Loft EVO Plus | 155            | 5                 | 4,5           | 800                          | 5                   |

9—After-Sales Service

In case of doubt or any anomaly, do not use the fireplace and please contact a specialized technician.

GlammFire fireplaces are manufactured under the strict Standard of the world recognized ISO 9001:2008 Quality Assurance Certificate.

GlammFire products are designed with superior components and materials, assembled by trained craftsmen who take great pride in their work.

Once assembled the complete fireplace is thoroughly inspected by a qualified technician before packaging to ensure that you, the customer, receive the quality product that you expect from GlammFire.

The GlammFire is always concerned with the environment. This is reflected when the projection of their products and their packaging. Focusing on the reduction of energy consumption, raw materials, natural resources and quantity of waste generated, GlammFire follows the policy of the 4R's (Reduce, Reuse, Recycle and Recover). Thus GlammFire have in mind the use of long lasting products as well as reusable and recyclable products.

The GlammFire recommend reusing the packaging GlammFire separately and deposit plastic, paper, cardboard and glass in the appropriate collection point.

*"In nature nothing is created, nothing is lost, everything is transformed."*
